

# Guess the Day

Ramadan is a holy month for Muslim in Arabic Calendar. Almost every Muslim remains fasting in this month. Ramadan month comes after “Saban” month. After seeing the moon , Ramadan becomes start. So every first date of Ramadan month, fasting starts . But there is no such fixed date in English Calender when Ramadan month becomes start. Such as In 2016 1<sup>st</sup> Ramadan was 7<sup>th</sup> June, in 2015 1<sup>st</sup> Ramadan was 19<sup>th</sup> June and so on.

Now , You have a foreign friend of other religion expect Muslim, he does not have no knowledge about Arabic Calender. So he asked you the name of the day , which day 2016 Ramadan Starts.

## **Input:**

There is no Input in this problem.

## **Output:**

Just Print the name of the day , which day 2016 Ramadan Starts.

If you are weak in coding , No problem . Just see the sample and replace the name of the day.

```
#include<stdio.h>

main()

{

printf(“Monday\n”);

}
```

N.B.
